PARENTS,

This chart is provided to help you find books that your child will be able to successfully read. This does not mean these are the only levels of books that are appropriate for your child. If your child is interested in the subject of the book, then success at a higher level could be achieved. If a chapter book is being read, then a little lower would possibly be better. All kinds of reading are encouraged! That is why there is a range.

We hope this is helpful.

If you have any questions about selecting books or finding a reading range for your son or daughter, please feel free to contact your classroom teacher or school librarian.
